

# A NEW WINDLASS

**DZC 902**

A new horizontal windlass has joined to the product range at the beginning of 2016. DZC 901/902 filled the gap between DZC 401 and DZC 1201/1202. DZC 901/902 will take place of DZC 1001/1002H which is only hydraulic driven and has been in production for long years. This new windlass model can be driven by DC, AC or hydraulic motors and suitable for chains up to 13 mm DIN 766. Please contact to DATA representative or check data sheet for details.
